Skills

- in **Python**, **C/C++**, **Java**

- Familiar with **JavaScript**, **HTML/CSS**, **SQL**

Development Tools & Frameworks:

- Web Development: **ReactJS**

- Database: **MySQL**

Artificial Intelligence & Data Science:

- **Machine Learning**: TensorFlow (Basics)

Software Engineering & CS Fundamentals:

- Object-Oriented Programming in Java (OOP)

- Data Structures & Algorithms

- Operating Systems, DBMS, Computer Networks

I'm a third-year B.Tech Computer Science Engineering student at Kalinga Institute of Industrial Technology (KIT) with a growing interest in software development and artificial intelligence. I have a fair grasp of coding, with experience in Python, C/C++, and Java, and I'm also comfortable working with basic web technologies like HTML, CSS, and JavaScript. I've worked on a few small projects, including a simple calculator app and a personal portfolio website, and I regularly practice coding problems to improve my understanding of data structures and algorithms. I'm currently exploring machine learning with TensorFlow and trying to understand how AI can be applied to real-life problems. I'm someone who enjoys learning new things, solving problems, and building useful tools. My goal right now is to find internship opportunities where I can apply what I know, gain real-world experience, and grow as a developer by working with a team on meaningful projects.

Education

KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY at BHUBHNESWAR , ODISHA

Bachelor of Technology in Computational Science Expected in July 2027
